Commissioner Robert McDowell

Dear Commissioner McDowell,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,
Azel Beckner

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet
-- but bad policies allow companies like AT&T and Verizon to
shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our
public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive
wholesale marketplace.
3. The freedom to access any content or services we want through
our devices.

These true open access standards should apply to the entire
wireless market.

Sincerely,

Kely Lopes de Oliveira

Kevin J Martin
Chair, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Kevin Martin:

The Internet has become an integral part of American life. We rely on it to learn, work, play and communicate on issues of importance to our communities. That is why all Americans - regardless of income, education or location - need access to Internet service that's fast, free and family-friendly.

Our nation's future broadband system must be engineered to bridge the digital divide that now separates too many Americans because of their economic circumstances and where they live. We must extend to all Americans the opportunity to take part in e-commerce, use government services, access news, information and educational opportunities and participate in civic discourse online.

Unfortunately, current broadband prices in the United States are too high and far too many households have limited or no connectivity. No American should be left behind because existing broadband options are not affordable or unavailable. Furthermore, the government should be working with business leaders to make sure that all students have Internet access that is fast, reliable and as safe as possible. Parents and teachers are currently saddled with the burden of trying to protect children from indecent content on the Internet. Network level filtration of indecent content is the best solution available to ensure that children cannot access explicit Websites, allowing parents and teachers to focus on the educational resources available online.

Implementation of a fast, free, and family-friendly universal broadband access program, like the proposal submitted by M2Z Networks (www.m2znetworks.com) and supported by the Coalition for Free Broadband Now, is a necessary step towards protecting our children online while ensuring that all Americans have affordable Internet access. This solution would remove many of the technological challenges currently faced by underserved communities $\frac{1}{2}$ both urban and rural. It will also help build an Internet-savvy population to drive the American economy to compete globally, provide the equality of access that is such an important step towards equality of opportunity.

I urge you to take action now to ensure these steps are taken.

Sincerely,

singh

Deborah Taylor Tate
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Deborah Taylor Tate:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Phil Pratt

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Thuy T. H. Nguyen

FCC Chairman Kevin Martin

Dear FCC Chairman Martin,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,
Donna Holt
